NMC 2010 PRIMARY LEVEL PAPER 1 QUESTIONS

SECTION A : 5 marks each

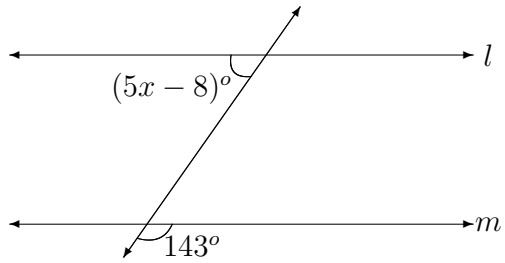

Qn. 1. $(99894 \times 2) + (99894 \times 3) + (99894 \times 4) = 99894 \times$ _____.

Qn. 2. I need 12 pieces of fruit to make 3 glasses of concentrated juice. How many pieces of fruit do I need to make 10 glasses of concentrated juice?

Qn. 3. Twice a number increased by twenty seven is 39. What is the number?

Qn. 4. Anna, Ben and Isaac share a sum of money. Their portions are in the ration 1 : 2 : 7; respectively. If Anna's portion is Shs. 20,000, what is the total amount of money shared?

Qn. 5.

Lines l and m are parallel, x equals _____

Qn. 6. The average age of five children is 6 years. Each child is a different age and there is a difference of two years in the ages of any two consecutive children. In years, how old is the oldest child?

Qn. 7. Janet participated in a Science contest. She received 3 marks for each correct answer but lost 2 marks for each incorrect answer. After answering 50 questions, Janet's score was 95 marks. How many questions did Janet answer incorrectly?

Qn. 8. My radio uses power of 9 Volts. Each 1.5 Voltage dry cell costs Shs. 500. How much money do I need to replace all the dry cells?

Qn. 9. The product of two different whole numbers is 7. Their sum is _____.

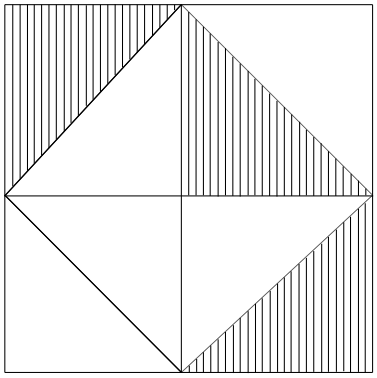

Qn. 10. Let $\boxed{N}$ be defined as:

$\boxed{N} = 2 + 4 + 6 + 8 + 10 + \ldots + N$, if N is EVEN
and
$\boxed{N} = 1 + 3 + 5 + 7 + 9 + \ldots + N$, if N is ODD.

What is the value $\boxed{2010} - \boxed{2009}$?

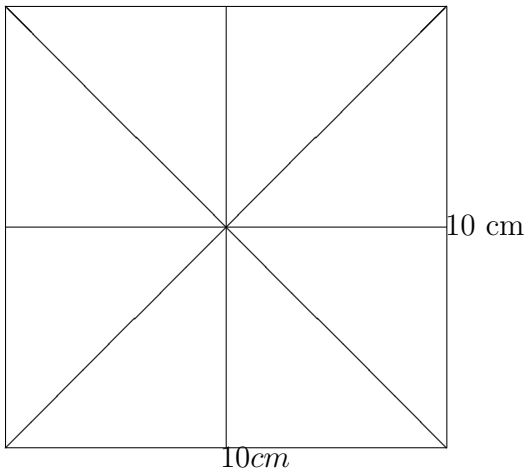

SECTION B : 10 **marks each**

Qn. 11. A square with a perimeter of 32 cm is split into 8 identical triangles as shown. What is the sum of the areas of the 3 shaded triangles?

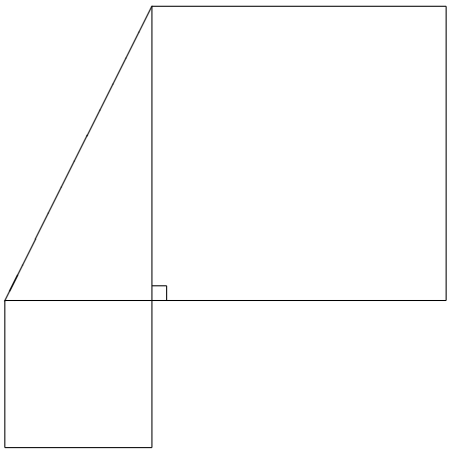

Qn. 11. A truck moves from town X to town Y at a speed of 50 Km/h and returns from town Y to town X at 70 Km/h. It travelled 3 rounds within 18 hours (one round is the movement from X to Y and then back to X). What is the distance between the two towns?

Qn. 13. Count all the right-angled triangles in the 10 cm by 10cm figure below:

Qn. 14. The figure below consists of a right angled triangle, a small square and a big square. One side of the small square is $2x$ cm and one side of the big square is $5x$ cm. The total area of the figure equals 850 cm^2.

(a) What is the value of x?

(b) What is the perimeter of the small square?

Qn. 15. The first 50 counting numbers are arranged in 5 columns, as shown below:

A	B	C	D	E
1	2	3	4	5
10	9	8	7	6
11	12	13	14	15
20	19	18	17	16
⋮	⋮	⋮	⋮	⋮

(a) What is the sum of all the counting numbers in column E (the last column)?

(b) If the columns are increased to 10 and first 50 numbers were arranged in the same way, what is the sum of all the counting numbers in the last column?
